NEW LIFE SCIENCE COMPANY APPOINTS ADVISORY BOARD

(Carmel, IN)—Diabco Life Sciences, LLC, a new life sciences company based in Carmel, Indiana, announced the formation of the Company's Advisory Board with the appointment of five prominent members, including James Morris, former Director of the United Nation's World Food Program. He will be joined by Terry Dwyer, Senior Vice president of Author House Publishing Company, Ted Engel, former President of the Kroger Company's Central Division, Peter Jensen, Owner and Chief Executive Officer of Emge Foods, and Dr. Larry Miller, former Senior Administrator, U.S. Department of Agriculture, Washington, D.C.

Diabco Life Sciences' research and product development programs focus on nutraceutical functional foods from whole grain derivatives formulated to address specific non-prescription health care needs of individuals. Nutraceuticals are nutrient dense functional foods, 'medical foods' by definition, that have been clinically tested and performance proven to successfully help mitigate specific health risks.

Diabatrol™, the Company's first nutraceutical product for diabetes management, was introduced in September of this year. Diabatrol™ is a performance proven dietary supplement specifically formulated and clinically documented to lower blood glucose levels and reduce insulin resistance in Type II diabetics and pre-diabetics. Clinical studies reported in the Journal of Nutritional Biochemistry scientifically document the effectiveness of Diabatrol's active whole grain derivatives in helping reduce Fasting Blood Glucose levels an average of 32.9 % (52 points). The easy to use water soluble packets of Diabatrol™ are designed to be an integral part of a total diabetes management program, providing both nutritional balance and blood glucose stabilization benefits. Diabatrol's performance claims meet the regulatory requirements of the U.S. Dietary Supplements, Health and Education Act, which is overseen by the Food and Drug Administration and enforced by the Federal Trade Commission.

As Senior Member, for Business Relations and International Program Development, Mr. Morris' business relationships worldwide help bring focus to the diabetes nutrition problems across a broad spectrum of business development opportunities. While diabetes clearly has become a serious health problem in the United States, the same diabetic health risks have become a matter of concern in India, Europe, the Mid-East and Latin America. In the United States Diabco Life Sciences is partnered with Byram Healthcare.

Terry Dwyer will serve as Senior Member of the Business Operations and Strategic Planning team. He will be joined by Ted Engel and Peter Jensen. Mr. Dwyer brings strategic operating and e-commerce business management experience to the Company, while Mr. Engel and Mr. Jensen bring seasoned food industry operating, sales management and business development experience.

Collectively these members provide Diabco Life Sciences with the strategic knowledge to help ensure the Company's objectives of achieving rapid growth and profitability in the dynamic marketplace for nutraceutical functional food supplements.

Dr. Larry Miller will serve as the Company's Senior Member for Science and Technology. As former Administrator of the U.S. Department of Agriculture's Cooperative State Research, Education and Extension Service, Dr. Miller brings broad scientific experience and a breadth of working knowledge concerning the governmental agencies responsible for regulating the food supplements sector. This experience has been extremely valuable to the Company's product development and regulatory compliance initiatives.

About Diabco Life Sciences, LLC

The Company's mission is to provide performance proven nutraceutical supplements to consumers seeking effective non-prescription alternatives to help mitigate specific health risks. Diabco Life Sciences strives to combine advanced science, nutrition and good manufacturing practices to bring clinically tested and scientifically documented products to market for meeting the daily healthcare needs of individuals. More information about the Company can be found at www.healthydiabetic.com or by writing Diabco Life Sciences, 484 East Carmel Drive, #204, Carmel, Indiana, 46032.
